

Top 50 People and 50 Places of the Bible

Top 50 Bible People

The purpose of this document is to give a quick view of the people identified in my Bible Model. A structured process and the Strong's Concordance identified approximately 50 people and 50 places that were referred to across several books of the Bible. Like strategic people and places referred to across several functions in a business, these are strategic entities of the Bible. It is not exactly 50 or 10. These are just good ways to model the Bible. In other words, knowing these people helps us understand the Bible. This document is another way of seeing these important people.

People

These 50 people are actually ten key people and the 40 people they knew. In other words most of what we know about these 40 people comes from in the stories of the 10 key people.
