

Flood Waters - To and Fro

The purpose of this document is to define the source and destination of the Genesis Flood Waters. From where could so much water come, and where did it go? As a basis for all my models (General Business, Personal Business, Sport and Bible Models) my previous documents have been based on the historical truth of Genesis. As stated in my documents, I believe the Earth is only six thousand years old. But, even though a need for our Savior requires man's sin to be the origin of all death, deceived by bad science many Christians question the truth of Genesis. For example: previously, because radiometric dating was unreliable I found no evidence of an old earth. This theory shows why radiometric dating was unreliable, and how it now supports the theory of a young earth. It also explains [Continental movement](#) at the time of Peleg. I am writing this document because this week I discovered some great science from Dr. Walt Brown predicting where the water came from and where it went. As a fountain, it came from a storage plate or level below the earth, and it became the Atlantic Ocean. See Dr. Brown's [theory](#), [story](#) and [book](#) on his website.

Science is Theory

All Science (including Evolution and Creation Science) will forever be only theory. The question has always been which theory predicts what we will find when we analyze the facts. Good science predicts. The theory I found this week explains why the fossil record shows large rocks, fish and boats on top of our highest mountains. In other words, it explains the over 17,000 feet of Genesis Flood Waters to and fro: where they went, and from where did they come.

Good Science Predicts

Dr. Walt Brown has the answer. Here is a short [five minute video](#) of his theory. For an overview, first read [Dr. Brown's life story](#). Then read his book (his website). They are both free on [Dr. Brown's website](#).

Summary: Flood Waters - To and Fro

The purpose of this document is to define the source and destination of the Genesis Flood Waters. From where could so much water come, and where did it go? My previous documents have been based on the historical truth of Genesis. As stated in my documents, I believe the Earth is only six thousand years old. But, even though a need for our Savior requires man's sin to be the origin of all death, deceived by bad science many Christians question the truth of Genesis. I am writing this document because this week I discovered some great science from Dr. Walt Brown predicting from where the water came, and where it went. As a fountain, it came from a storage plate or level below the earth, and it became the Atlantic Ocean. See Dr. Brown's theory, story and book on his website.
