

Proof of Creation

The purpose of this document is to define some proof that God really did create everything. As I was listing his [deeds](#), I realized they were indirect proof of Creation. In other words, in those deeds we have direct historical evidence of his creation power. But, there is no way to prove things that happened before his story. Even with all the talk of how old things are, there is no way to prove age before his story. And, there is no story besides his story. Besides his people, no other civilization had a prophetic future to remember and track. So they just were not interested. For example: the history of China in the Seattle Library is in large yellow books that fill two large book racks, maybe a hundred volumes total. However, the introductory pages of that "History" support my point, saying that (because the Chinese were not interested) before the Jews arrived in China there was no history. This is because all history has a prophetic element. For there to be meaningful history, the collection buckets called accounts must be set up in advance. What we do have in history is no proof of evolution and much proof of God's creative power.

Creation Power in God's Deeds – with Evidence

We have evidence that [God separated the continents](#) 1,500 years after Creation at the time of [Peleg](#). The Earth's crust looks like broken eggshell after that movement. We have evidence that the whole Army of Egypt with all of their Pharaoh's Chariots lie on the bottom of the [Red Sea Crossing near Nuweiba](#). The chariot wheels, armor, and horses' hooves are still there. We have evidence that the Five Cities of the five great kings of the Plain including [Sodom and Gomorrah](#) were all destroyed by fire from above in one moment. The brimstone and evidence of the buildings and statues are still there spread over 10,000 square miles. We have evidence of the [Star of David](#) over Bethlehem at the time of Jesus' birth. That knowledge came from Adam to the names of the stars and planets to the wise men 2,000 years before and now we can still prove it 2,000 years after. History records the ten plagues of Egypt caused countries for thousands of miles around to fear God and his People. On [Mt. Sinai](#) near the Desert of Sin in Saudi Arabia or Media at that time, God gave Moses "The Law" which agrees the law he wrote on our hearts before time began that we call our conscience. It is like someone showed a Salmon the route he takes to spawn and he says: "Yea, that's the one." That is internal proof of the creative power of God. On the other side of that mountain is [Meribah or Masseh](#) where God had Moses open a split in the rock to give His People water. Read the Deeds. There are many more proofs.

Summary: Proof of Creation

The purpose of this document is to define some proof that God really did create everything. In God's deeds we have direct historical evidence of his creation power. But, there is no way to prove things that happened before his story.
