TW Production Provides

Shared High-Tech Fabrication

Shared Shipping and Receiving

Shared Website

Shared Scorecard, Accounting

Shared Amazon

Shared E-bay

Shared Storefront

TeamsWin High-tech Provides Just-in-Time Profit:

TeamsWin High-tech Fabrication Production provides complete cost effective business services from design to profit. You provide the numerical design, we provide the shared fabrication, shared business services, shared store on Main Street in Bonners Ferry, and you get the profit. With High-tech Just-In-Time manufacturing you will know the profit for each product before we put it up on Amazon or E-bay. We will also show you how the costs of all these services are shared. Because they are shared, you will see we both get a great deal.

Boundary County Measurement

Plus Machine Sharing:

TeamsWin High-tech Fabrication allows customers to bring their own machine to our business so they can share its cost with others. They do not have to pay for the use of their machine, but others pay them.

We will have the same type (but some larger and higher quality) additive and subtractive numerically controlled machines found in the Boundary County Library's MIT Fab Lab: Laser Cutters, Laser Lathe, Laser Routers, and 3D Printers. But, as opposed to a Lab, this will be Fabrication Production for Profit.

Plus, as required we will have metal and composite printers.
